If you do not choose to install from media, all data will be replicated from this source domain controller. We are talking about a Microsoft upgrade.

On clean installs, this is a sign that we are installing onto a virtual environment. What messed up the first migration was the fact that when I used the VMware convertor on my production SBS box to make a copy it created a ghost NIC which totally stuffed Migration the bindings in AD. Furthermore, we can safely assume that the failures are cascading. HiCris, Sorry I haven't posted. Clicking No on this dialog will almost certainly mean a failed setup.
