Genetically identical plantlets are thus available for distribution to farmers, horticulturalists, forestry growers, and nurseries all the year round. When a contaminant interacts with an organism, substances like enzymes are generated as a response.

This book introduces various fields of metal biotechnology, emphasizing gaps. Although the nutrient content of pond effluents may be too low to affect crop production, effluent water not useful for catfish cultivation can find application for irrigation of crops and thus reduce discharge volume. The filtered wastewater was collected from the lower chamber of the filter through a tap fitted to the chamber. It is a viable project which can be adopted since it requires less energy consumption and minimal technological effort.
