In a small number of countries, students have a completely free choice among all the schools of the type in which their training qualifies them to teach, and they make their applications directly to the school in which they wish to serve. Education, discipline that is concerned with methods of teaching and learning in schools or school-like... In countries where technical or vocational education forms an important part. The teacher must adjust to new developments in educational technology, the growth of human knowledge, and the problem of creating a relevant and appropriate curriculum from the enormous range of material available. In other countries, such as England and France, requirements are determined on a national basis. The importance of the element of general education has been defended on various grounds. In normal schools and colleges, and some universities, the three elements served both ends and also provided an introduction to a systematic exploration of human conduct and affairs that was both educationally defensible and important in its own right.

There will be new understanding of how children develop and learn.
