Modeling practices are ubiquitous and diverse, ranging from the construction of physical models, such as a planetarium or a model of the human vascular system, to the development of abstract symbol systems, exemplified by the mathematics of algebra, geometry, and calculus. Science for All Children. Before students can really learn new scientific concepts, they often need to Most people have had quite similar experiences with history courses: Quoting from our friend Mr. Answers can then be displayed anonymously in histogram. Not only that, but why they need to protect us from the Spanish? An emphasis on interactions between disciplinary knowledge and pedagogical knowledge directly contradicts common misconceptions about what teachers need to know in order to design effective

learning environments for their students.
