Sydenham's chorea is characterized by the abrupt onset sometimes within a few hours of neurologic symptoms, classically chorea usually affecting all four limbs. Dance Saints Dance Network's James Palmer highlights the personnel developments that could happen for the New Orleans Saints over the next few weeks that could make their offense even more difficult to stop.

Movements ceased during sleep, and the disease usually resolves after several neurologic symptoms include behavior change, dysarthria gait disturbance, loss of fine and gross motor control with resultant deterioration of handwriting, headaches slowed cognition, facial grimacing, fidgetiness and hypotonia.
