Counterfeiting remains a huge problem, causing harm for brand owners in lost sales and harming consumers with substandard and sometimes dangerous goods. We will champion the use of Proceeds of Crime seizures in IP investigations. Intellectual property security is also difficult because it can be hard to determine who owns what and which licensing requirements govern how a given intellectual property asset can be reused. Byallowingdigitalcontentcreatorsandownerstoregistertheirassetsona Selasa, 09 September The difficulty of defining and protecting intellectual property in an all-digital age. Applications and third parties will have to do their part to plug into the

ecosystem for all of this to work. Our aim is to make it easier for consumers to recognize legitimate content, and to understand the harm caused by piracy.

That person likely creates original digital content and also republishes content. There is much debate on how best to protect such a knowledge system considering its implications for various policy issues and sustainable development in general. We have had some success here already, with the Infringing Website List now beginning to starve piracy websites of the advertising money they need to survive, but we are now looking to push this out further, to other intermediaries and other territories.
