Traditionally, a diagnosis of infection by EV, such as herpangina or hand, foot and mouth disease HFMD was a source of relief in the evaluation of children with aseptic meningoencephalitis due to its generally good prognosis. Body mass index To measure the BMI, the height and weight of each child were recorded at the same time of the clinical examination.

Relationship between caries, body mass index and social class in Spanish children. In addition to age and gender, information was obtained on social status, using the classification based on parental occupation validated in Spain. Moulay Mohammed bin Hassan 5.
